PROFESSIONAL SUMMARY

Fourth-year BS Information Technology student at Mapúa Malayan Colleges Laguna, specializing in full-stack, Android, IoT, and cloud systems. Seeking an on-the-job training placement beginning November 2026 (486 hours). Holds 31 certificates and course completions across Amazon Web Services, DevOps and Kubernetes, cybersecurity, data analytics, and product management. Builds the Android client, the REST layer, and the firmware that talks to both, then holds the schedule that keeps the build shipping. Project lead on a Filipino-cuisine word game now in capstone, and President of the Information Technology Society for A.Y. 2024-2025.

TECHNICAL SKILLS

Cloud Computing: Amazon Web Services (EC2, S3, RDS, VPC, IAM, CloudWatch, SNS, AWS Backup, Systems Manager); Microsoft Azure (App Service, Blob Storage, Azure SQL, Cosmos DB, Key Vault, Azure AD B2C); cloud architecture, deployment, and cost optimization

DevOps and Automation: Docker, Kubernetes, container orchestration, CI/CD pipelines, Infrastructure as Code, monitoring, Git

Programming: Kotlin, Jetpack Compose, PHP, C#, JavaScript, Python, C/C++ (Arduino), Java, HTML, CSS, XML, x86 assembly; OOP; data structures and algorithms

Databases and Data: MySQL, SQL Server, Oracle SQL, PostgreSQL, Azure SQL, Cosmos DB; data cleaning and analysis; Power BI, Tableau

Web and Mobile: REST API design, PHP, ASP.NET, Android (Kotlin, MVVM, StateFlow, Retrofit), responsive web, Figma

Systems and Integration: System analysis and design, RFID, MQTT, UART/serial, SOAP, role-based access control

Cybersecurity and Networking: TLS/SSL, hashing, RBAC, Data Privacy Act (RA 10173) awareness; TCP/IP and Cisco CCNA: Introduction to Networks

IoT and Embedded: Arduino Uno, ESP8266 / WEMOS D1 Mini, FreeRTOS, sensor and actuator integration

Delivery: Agile and Scrum, project management, technical writing, architecture diagrams, user-journey documentation, event operations

EDUCATION

Bachelor of Science in Information Technology | Mapúa Malayan Colleges Laguna, Cabuyao, Laguna
Expected graduation: 2027 | Fourth year

Honors and awards

- Consistent President's Lister
- Full Academic Scholar, Mapúa Malayan Colleges Laguna
- Second Place, College of Computer and Information Science Duo Singing Competition

PROJECT EXPERIENCE

Kusina Kode: Filipino Culinary Word Puzzle | Capstone | 2025 to 2026 (in progress)
Project lead and developer, game systems and cloud integration

- Leads an Android word-puzzle app that teaches regional Filipino dishes: 6x6 guess grid, image-tile keyboard, hints, timer, and trivia cards.

- Built the game engine and the backend: PHP REST with PDO, four SOAP analytics operations, and a MySQL schema normalized to 3NF.
- Wired Jetpack Compose screens to StateFlow ViewModels; added an ASP.NET admin portal so levels can be edited without a new app build.
- Capstone scope adds cloud sync and a controlled reward ledger. User testing returned about 4.8 out of 5 with no critical crashes.

D.I.L.I.G. Smart Plant Care | IT145 / IT155P | 2026

Project manager | Mobile, IoT, and full-stack developer

- Five-tier household irrigation: Arduino sensors and pump, ESP8266 serial-to-HTTP gateway, 12-endpoint PHP REST API on MySQL, Kotlin / Jetpack Compose Android app.
- Wrote the Android client (MVVM, StateFlow, Retrofit), Arduino AUTO watering firmware, ESP8266 gateway, and the PHP/MySQL hub both the app and the browser dashboard read from.
- Documented contracts between tiers so a mid-project firmware change integrated without rewriting the app or API. Added liveness detection and retry on pump-stop.

BNK WMS: Pet Boarding and Grooming System | 2026

Team lead / project manager | Full-stack developer | RFID integration

- 278-file PHP application for a real grooming and boarding shop: customer booking, staff operations, and admin configuration.
- Designed the MySQL schema and the RFID scan, lookup, and last-scan API used at the counter. Staff send boarding updates; admins pull PDF reports.

PulsePoint Clinic Scheduling | CS103P | 2025

Project manager | Documentation, research, and database

- Clinic booking for patients, doctors, and secretaries on ASP.NET Web Forms and SQL Server, after a Figma prototype.
- Owned the schedule, the written study, and the logical ERD. The research pack includes a countersigned letter of request from St. Luke's Medical Center Global City.

AWS-ome Tech: Cloud Infrastructure for a Retail Client | IT191-4P | 2026

Project manager | Cloud infrastructure and documentation

- Target-state AWS for a client with no existing cloud: two-AZ VPC, public and private subnets, EC2, RDS MySQL, S3, IAM, CloudWatch, SNS, and AWS Backup.
- Delivered the handover set: design document, deployment guide, administrator guide, knowledge-transfer notes, operations runbook, and cost report.

Cloud Infrastructure and Website Proposal, BMS Group International | Freelance | July 2026

Sole author

- Authored a 45-page technical and commercial proposal for a DMW-licensed overseas recruitment agency with no website or in-house IT staff.
- Designed the proposed AWS hosting and security controls, and specified applicant data handling under Republic Act 10173 (Data Privacy Act).

Additional academic projects

- ShuttleCock / MakiRide: project contributor and user-journey author on a campus shuttle booking design in Figma (100+ screens), later evolved into MakiRide.
- Pixels of Meaning: three pixel-art pieces drawn in x86 assembly through INT 10h, with no bitmap data. Solo.
- Classroom reservation occupancy indicator designed with logic gates, plus C# WinForms, Oracle SQL, and Python GUI coursework.

LEADERSHIP AND ACTIVITIES

President, Information Technology Society (ITSOC) | Mapúa Malayan Colleges Laguna | A.Y. 2024-2025

Elected role

- Directed IT programs, seminars, peer mentoring, and member engagement for the campus IT Society.
- Hosted the IT General Assembly and CCIS Week programming activity. Coordinated Pamaskong Handog outreach at Diezmo Integrated School (December 2024).
- Ran two peer-mentoring sessions on logic design and Karnaugh maps (October and November 2024). Eight of nine mentees who attended the K-map session passed their exam.
- Organized Actionable Insights: Remote Sensing and Geomapping in Practice (June 2025), recognized by the Dean of CCIS.

Student Ambassador | Mapúa Malayan Colleges Laguna | 2023 to 2025

- Represented the school in recruitment and student-facing events.

Community service | 2024

- Helped plan and run Halaman-ang Kapit-Bisig: Proyektong PUNO ng Pag-asa, a community tree-planting and gardening initiative.

CERTIFICATIONS

Cloud computing and Amazon Web Services

- AWS Cloud Technical Essentials, Amazon Web Services, February 2026
- Architecting Solutions on AWS, Amazon Web Services, February 2026
- Building Data Lakes on AWS, Amazon Web Services, February 2026
- AWS Certified Data Analytics Specialty (2023) Hands-on Specialization, Packt, March 2026
